Quick Details

Classification: Sulphate

Type: Sodium Persulfate

CAS No.: 7775-27-1

Other Names: Sodium Persulfate

MF: Na2S4O8

EINECS No.: 231-892-1

Place of Origin: China (Mainland)

Purity: 99% min

Appearance: White crystal

Application: Polymerization, Metal treatment,etc.

Description:

Sodium Persulfate is a white crystal without odor, which are often used as a strong oxidizer or monomer polymerization initiator. It hardly absorbs moisture. Due to its extremely high pureness and stability, it can be stored easily. Besides, it also features in simple and safe usage, etc.

Packaging & Delivery

Packaging Details: 25kgPE, packaged with PE bag or 25kg paper carton;or according to your customer requirement.

Delivery Time: Prompt shipment, usually 15days after received your advance payment

Storage

Sodium persulfate is not combustible, but assists combustion of combustible materials due to release of oxygen. It must be stored in a dry location away from heat and a cool, well-ventilated area away from all sources of ignition and out of direct sunlight, protected from moisture. Keep containers tightly closed, labeled and well-sealed. Ensure pressure relief and adequate ventilation. It must be stored separately from organics, rust or traces of metal, reductions and others incompatible materials to avoid catalytic decomposition.
